Notification of International Search Report in Corresponding PCT Application

Dear Madam or Sir:

A PCT Application corresponding to the instant application was filed on October 5, 2004 under Serial No. PCT/US2004/032,685.

Applicant has received Notification of Transmittal of the International Search report. A copy of the International Search Report is attached. Applicant requests that this report and the references cited therein be made of record in the File History of the instant application and that the Examiner give the references cited the same attention as any other references that would come to the attention of the Examiner.

Also attached is a copy of the Article 19 Amendment filed in response to the International Search Report.

Respectfully submitted,

Jeffrey M. Babicz

Attorney Docket No. S 102-09

International Application Serial No.:

Re: Article 19 Amendment

PCT/US2004/032685

Date: 20 October 2004

**International Filing Date:
05 October 2004**

**Priority Date:
22 October 2003**

Title: Chocolate Processing Machine

**International Bureau of WIPO
34, Chemin des Colombettes
1211 Geneva, Switzerland**

Dear Madam or Sir:

This in response to the International Search Report mailed 01 March 2005. Pursuant to Article 19, and without prejudice to their later re-introduction in independent form, claims 6 and 11 are being amended.

Claims 1 through 5, 7 through 10 and 12 are unchanged. Claims 6 and 11 have been amended so as to be dependent on claim 1.

Copies of claims 6 and 11 as originally filed are enclosed on an attached sheet so marked, and copies of amended claims 6 and 11 are enclosed on an attached sheet so marked. In the amended claims, words added have been underlined and words removed have been bracketed.

Statement under Article 19(1)

All the claims of this Application are novel and involve an inventive step in that none of the Documents cited in the International Search Report disclose digital, programmable means for controlling rotation of the machine in addition to controlling the heating and cooling and this limitation is supported throughout the application as filed.

Claim 6 that was previously an independent claim is now dependent on claim 1 and adds the further limitations "means for causing rotation and application of heat within the machine to the chocolate being tempered over extended periods of time; and, means for timing the length of rotation and application of heat".

Claim 11 that was previously an independent claim is now dependent on claim 1 and adds the further limitations " means for selecting the temperature and cycle of heating and cooling of chocolate within the machine to form a recipe; means for storing a plurality of recipes to form a menu; and, means for recalling a recipe from the menu for later use ".

Kindly continue the review of this application in view of this amendment.

Respectfully submitted,

Joseph L. Spiegel
